Spartanburg Water is pleased to announce that Janet Hurley Cann P. E., Engineering Project Manager at the Spartanburg Sanitary Sewer District, was elected President of the Water Environment Association of South Carolina (WEASC) on March 25, 2009 at the 19th South Carolina Environmental Conference at Myrtle Beach. The WEASC was organized in 1927 as an incorporated non-profit organization of 2700 water environment professionals from across South Carolina. Its purpose is to promote and advance water environment professionals through education and to benefit the State of South Carolina and its citizens through protection and enhancement of the water environment.

“This achievement is well deserved as Janet is someone who has dedicated her career to the water profession,” said Gene Jackson, Director of Engineering at Spartanburg Water. “Janet will do all she can to promote, protect and preserve the water environment that so many citizens take for granted.”

Janet received her undergraduate degree in Civil Engineering from Clemson University and her Masters in Engineering from the University of South Carolina. She received her Professional Engineer (P.E.) certification in 1989 and has been employed at Spartanburg Sanitary Sewer District since May 4, 1987.

Spartanburg Water – An Award Winning Utility.
