## **SPARTANBURG WATER SYSTEM BOIL WATER ADVISORY**

### **Water main break repair will require temporary disruption of service to customers followed by a boil water advisory for some Spartanburg Water customers**

SPARTANBURG – On Thursday, July 17, Spartanburg Water System (SWS) experienced a water main break after an accident involving a contractor working in the area. This caused some customers to experience an interruption of service or low water pressure.

We provided a temporary fix to the affected water main, however, a full repair is required. Water service will need to be suspended while the repair is being completed, and we will work to make the repair and bring the line back into service as quickly as possible.

Once repaired, the affected area will be thoroughly flushed and tested. As a precautionary measure, after water service has been restored, and test results can be reviewed, customers are advised to boil water intended for drinking or cooking vigorously for at least one (1) full minute prior to use. Also, any ice made from water that has not been boiled should not be used for drinking purposes.

### **This advisory will remain in effect until further notice.**

We apologize for any inconvenience and are working as quickly as possible to resolve the issue, at which time we will notify our customers. The affected customers are located in or around the following areas:

- Cannons Campground Rd.
- Kelly Rd.
- Casper Dr.
- Correll Ct.
