5. SEWER MAINLINE REHABILITATION AND CREEK CROSSINGS REQUEST FOR QUALIFICATIONS

Qualifications were received on March 6, 2018, in response to a Request for Qualifications (RFQ) that will allow SSSD to compile a list of pre-qualified contractors to rehabilitate or repair collection system mainlines and creek crossings for repair. There are a number of areas where collection system lines and/or line crossings that span creeks and tributaries are in need of repair due to age or storm damage. The pre-qualified contractors will be called upon to submit competitive bids when the rehabilitation or repair work is scheduled by the Collection and Distribution Department. This alternative delivery method will expedite the competitive bidding process and allow construction work to be completed in a proactive manner.

Responses were received from six contractors. Each of the respondents were scored based on the following criteria: (1) Qualifications, prior experience (2) Technical competency, project approach, strategy, and innovation (3) MWBE utilization; (4) Community Benefit Program.

After careful evaluation, management recommends approval of each of the following respondents as pre-qualified contractors that SSSD will use to rehabilitate or repair collection system lines and creek crossings.
