FOR IMMEDIATE RELEASE

Spartanburg Water Recognizes Industrial Partners for Compliance

Seven industrial companies recognized for commitment to treating wastewater and protecting water resources

SPARTANBURG – Spartanburg Water is proud to recognize seven industrial customers for their commitment to protecting the environment and our water resources.

These companies help Spartanburg Water keep our customers, sewer systems and receiving streams safe by meeting the standards and regulatory requirements outlined in their Industrial Pretreatment Discharge Permits.

The National Pretreatment Program defined by EPA as “a cooperative effort of federal, state, and local environmental regulatory agencies established to protect water quality.” This EPA program has been utilized for more than 30 years. By treating wastewater before it is released into our sewer collection and treatment system, commercial and industrial facilities help to remove harmful pollutants that could otherwise reach our streams, rivers, lakes and oceans.

Spartanburg Water has developed its pretreatment program based on federal, state and local requirements. The following companies were 100 percent compliant with their industrial wastewater permits for the 2021 calendar year:

- Crane Instrumentation & Sampling, Inc.
- DFA Dairy Brands Fluids, dba Pet Dairy
- Lubrizol Advanced Materials
- Michelin Tire Corporation – US3
- Parker Hannifin - O Ring Division and Engineering Seals Division TechSeal – Operations
- Phenix Engineered Textiles, Inc.
- Siemens Industry Inc.

By working with these industrial customers, Spartanburg Water is able to achieve an excellent compliance record for its permitted wastewater treatment facilities.

These awards are a testament to the dedication of Spartanburg Water and its partners to improving the quality of our water resources and our quality of life.

ABOUT SPARTANBURG WATER: Spartanburg Water, an industry-leading utility, is comprised of Spartanburg Water System and Spartanburg Sanitary Sewer District. It serves a population of nearly 200,000 within Spartanburg County, as well as others in parts of Greenville, Union and Cherokee counties. With the help of its dedicated team of 300 employees, each day it produces an average of 25 million gallons of drinking water and cleans 14 million gallons of wastewater for its customers and community.
