Spartanburg Water to Begin First Phase of Otis Boulevard Waterline Project

The project will replace the waterline from Palmetto Street to S. Pine Street

SPARTANBURG – Beginning the week of September 19, Spartanburg Water will begin the first phase of a project to replace the waterlines along Otis Blvd., between Palmetto St. and Pine Street.

As part of Spartanburg Water's ongoing investment in our drinking water infrastructure, this project will replace aging waterlines, and so reduce instances of line breaks and disruptions to service to those living in this area of the Converse Heights neighborhood.

Construction on the first phase of this project will begin the week of September 19, and end prior to Thanksgiving, dependent on weather impacts. During the project, news and updates will be posted to a recorded message line: (864) 580-2055. Residents are also welcome to call the Spartanburg Water Customer Service team at (864) 582-6375.

"Our team recognizes that this project will cause some disruption as we work to complete it, and we are committed to reducing inconveniences wherever possible," said Guy Boyle, Spartanburg Water Chief Executive Officer. "We are committed to investing in our community's infrastructure and maintaining the highest quality of service, and are dedicated to cooperation as we make this essential and necessary improvement."

ABOUT SPARTANBURG WATER: Spartanburg Water, an industry-leading utility, is comprised of Spartanburg Water System and Spartanburg Sanitary Sewer District. It serves a population of nearly 200,000 within Spartanburg County, as well as others in parts of Greenville, Union and Cherokee counties. With the help of its dedicated team of nearly 300 employees, each day it produces an average of 25 million gallons of drinking water and cleans 14 million gallons of wastewater for its customers and community.
